Work Experience

Mobisoft Infotech

Principal UX Designer / Jan 2017 - Present

I work as an individual designer on the key projects along with keeping an eye on overall design deliverables by the company. I am leading a team of 8 designers and actively involved in design reviews. In last 3 years I worked on multiple logistics and healthcare projects including one of the biggest pharmacies of North America. I designed and led the team developing an accessible booking system for the University of Illinois. I collaborate closely with managers, tech leads, developers and clients. I also contribute to designs blogging in the organisation.

Currently I am working on the zone management and scanning system for the warehouse workers and drivers for the Lanter Delivery Systems.

I won the **Most Valuable Player** of the company award in Jan 2020

Talkd. Pvt Ltd

Application Experience Leader / Apr 2015 - Dec 2016

Worked as an Interaction designer on a variety of projects from automotive, education and retail sector including the service portal design for McLaren. Led the team of 6 people including designers and developers for lead management product. Led multiple mobile and website design projects.

Infosys Ltd.

Operations Executive / July 2012 - Apr 2015

Designed and developed multiple tools for the team to simplify daily tasks. My core responsibilities were providing tech support. I worked with technologies like Microsoft SCCM, Outlook, Active Directory and Windows.
